

MIDAS # 5028

MOODY POND

WATERBORO TWP., YORK CO., MAINE

AREA 18 ACRES

MOODY POND

Waterboro Twp., York Co.
U.S.G.S. Waterboro, Me. (7.5')

Fishes

Brook trout
Minnows
Golden shiner

Hornpout (bullhead)
Banded killifish
Threespine
stickleback

Physical Characteristics

Area - 18 acres

Maximum depth - 23 feet

Temperatures:

Surface - 66°F

20 feet - 41°F

Principal fisheries: Brook trout, hornpout

Moody Pond is a small, undeveloped water located in a populated area of the state, yet it offers the appearance of a remote trout pond. The pond thermally stratifies each summer and develops a severe oxygen deficiency below 10 feet, which prohibits the possibility of developing a good brook trout fishery. In addition, large numbers of competing species impact brook trout performance. As a result, legal sized brook trout are stocked each spring and they are providing a popular short-term fishery for local anglers.

A privately owned access road is located off Middle Road. Springtime access is mostly limited to 4-wheel drive vehicles or walk-in.

Surveyed - August 1954
